

Adjusts your posture and trunk
from the soles of your feet.

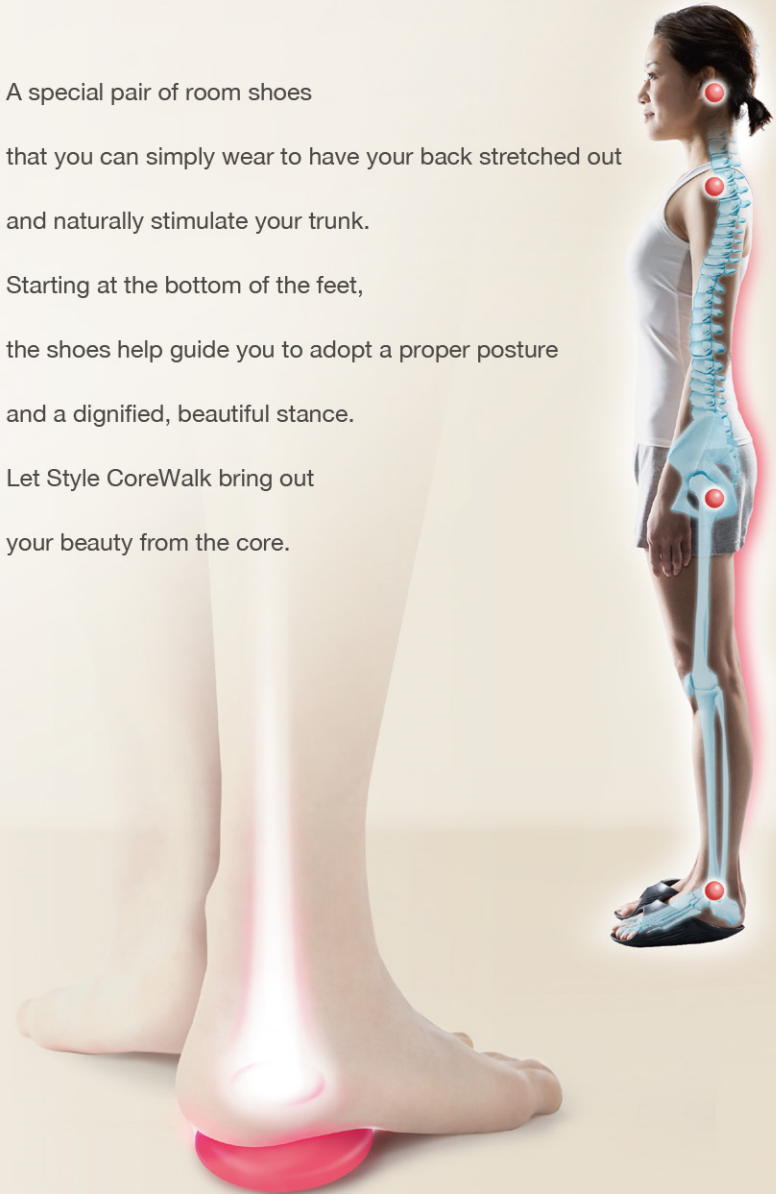

Style
CoreWalk

"Style for your feet" that works from the soles of your feet, correctly positioning your trunk and guiding you to a proper posture.

A special pair of room shoes that you can simply wear to have your back stretched out and naturally stimulate your trunk. Starting at the bottom of the feet, the shoes help guide you to adopt a proper posture and a dignified, beautiful stance. Let Style CoreWalk bring out your beauty from the core.

A chiropractic method for correcting your posture from the soles of your feet.

When the body's axis is improperly positioned, its posture tends to suffer. Style CoreWalk focuses on the anklebone, the key factor to supporting the body's axis in the proper position and correcting its posture. From the soles of the feet, the shoes help adjust the body's axis and guide it to its proper posture.

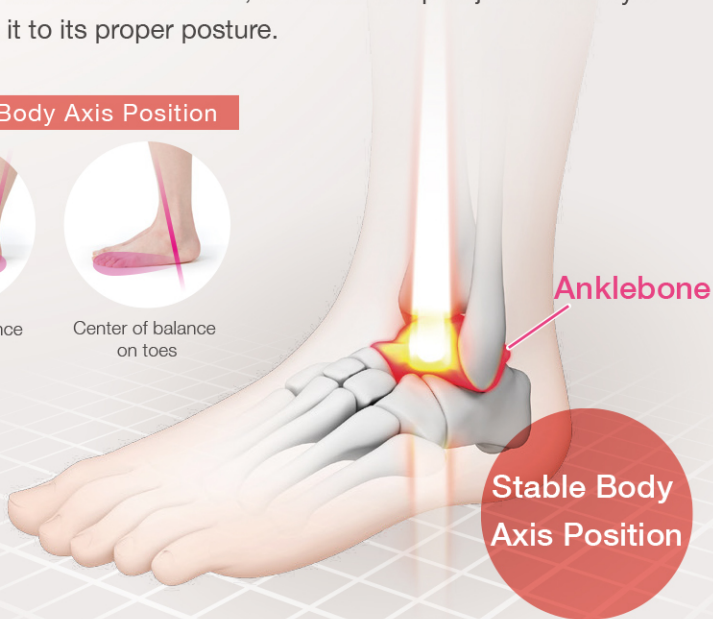

Unstable Body Axis Position

Anklebone

Stable Body Axis Position

Anklebone Assistance

For a proper posture, the anklebones support the correct alignment of the body's axis at the lowest end. With a well-positioned support protruding from the area under the anklebone, the shoes increase your awareness of the proper positioning of your body's axis to help adjust its posture.

Anklebone

The deciding factor for posture care is the anklebone. A well-balanced body starts from the soles of your feet.

When your posture is correct, the foundation for your body's axis is where your body touches the ground: your feet. Specifically, it's your anklebones. If your body becomes accustomed to its axis positioned on the anklebones, it will naturally assume a proper posture. The postural improvement leads to a well-balanced trunk which effectively results in a firm and beautiful body.

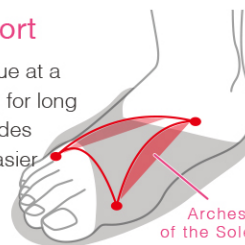

CENTRAL CHIROPRACTIC, Chiropractor

Takeharu Daito

Plenty of features for easy walking

Sole Arch Support

Designed to keep fatigue at a minimum when walking for long periods of time, both sides are higher to make it easier to move the muscles in the soles of the feet.

Arches of the Sole

Front Grip

Designed with a structure that fits the toes and allows them to grip as you walk, adding comfort to every step.
