Refreshing
and invigorating...
Take your skin
to its purest level.

C A R B O N I C A C I D B E A U T Y C A R E

The carbonic acid beauty care solution.

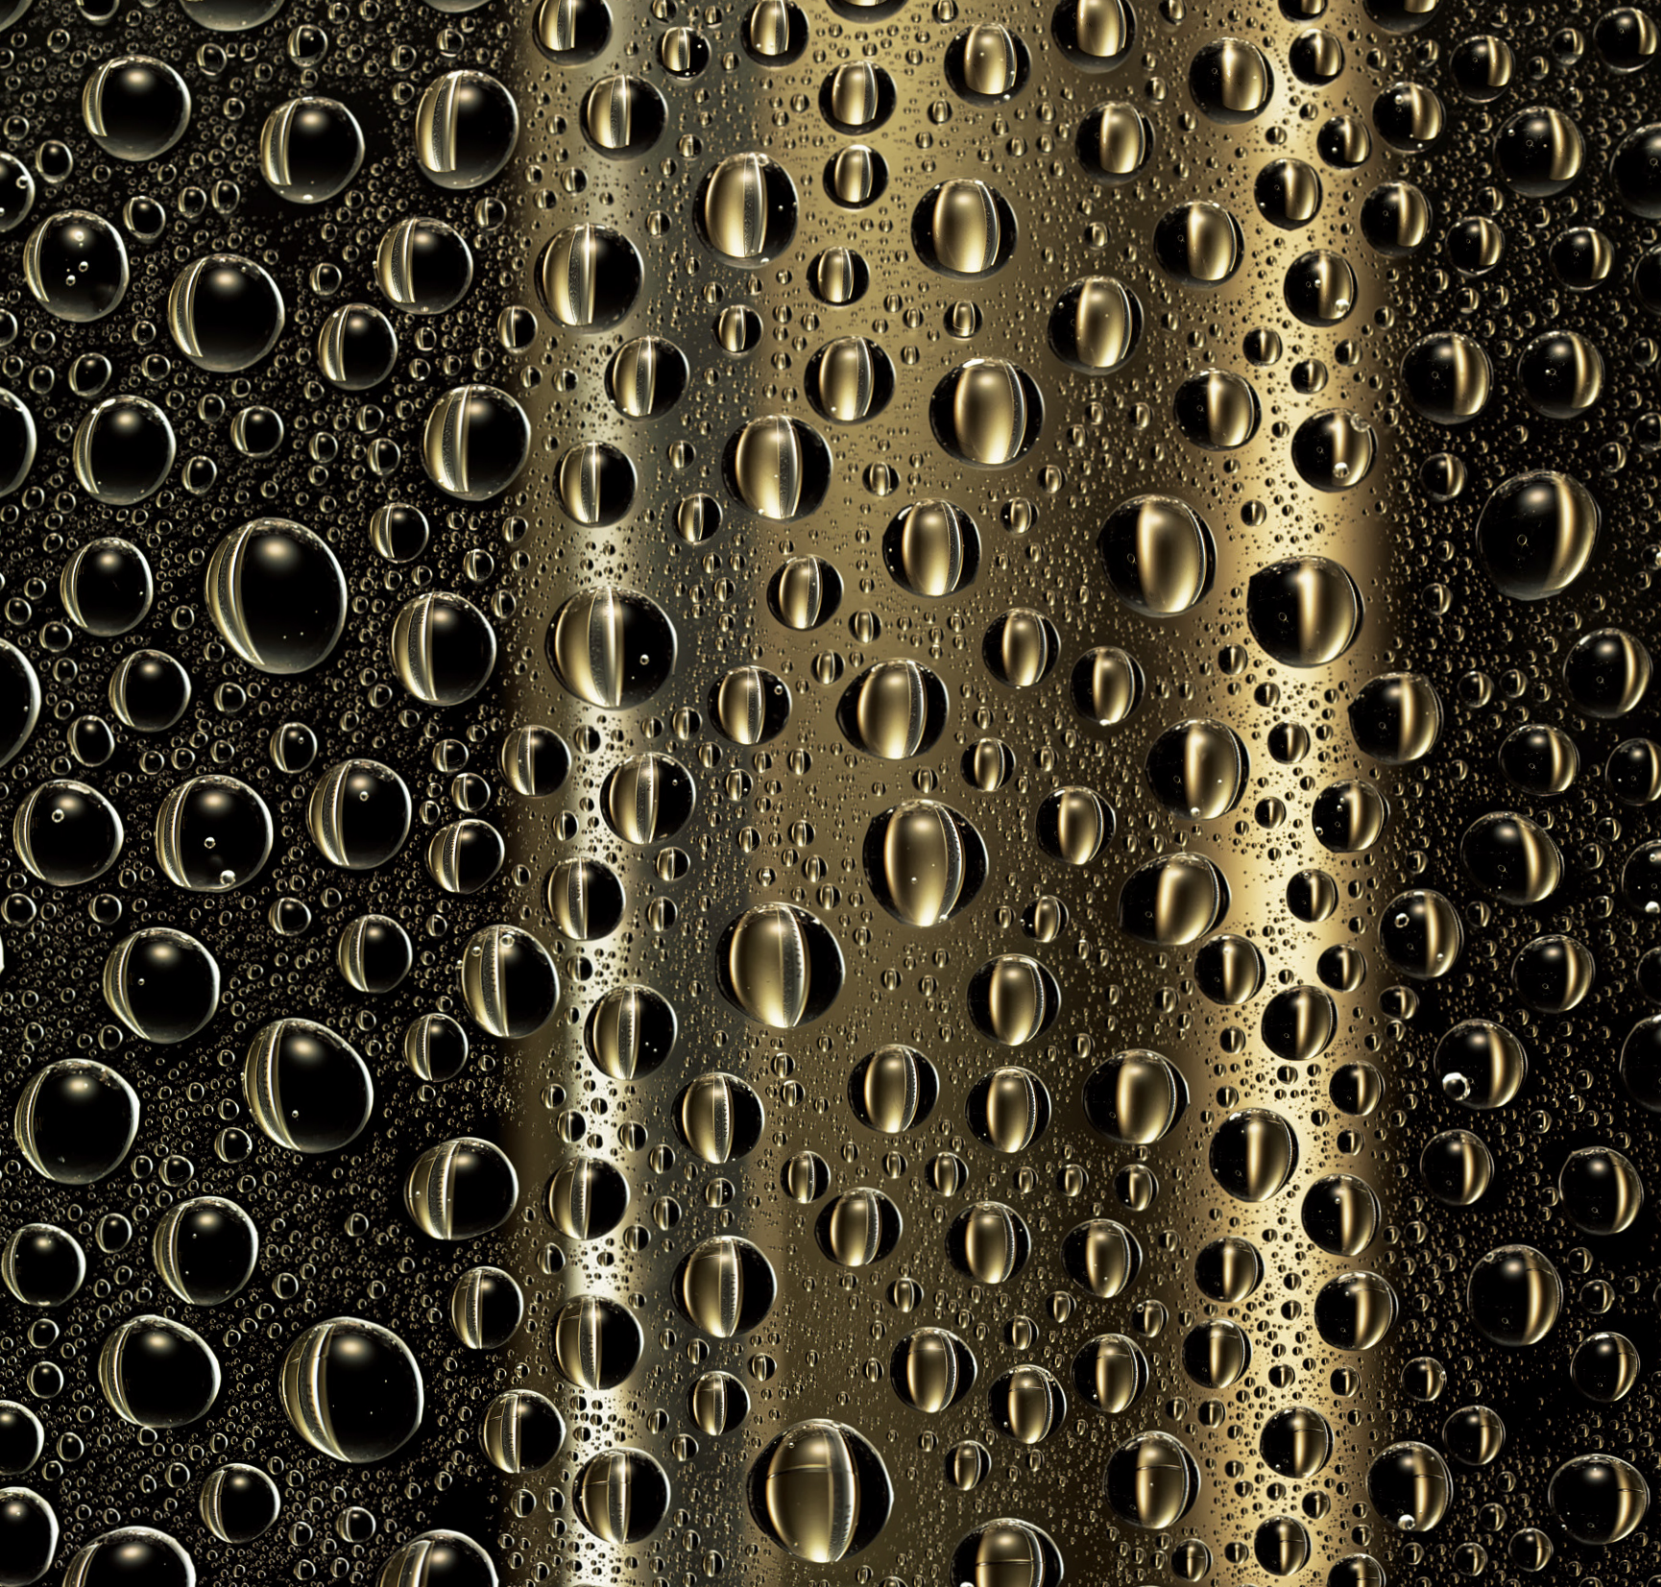

Carbonic acid has long been recognized for its beneficial properties.

It's one of nature's gifts that has played a historic role in beauty treatment.

"PLOSION" carbonic acid beauty care was born from an innovative concept that goes beyond the conventional approaches to beauty treatment.

It's a refreshing and invigorating experience that is felt from the moment your skin is immersed in PLOSION's high-concentration carbonated mist.

It's an experience to be felt with every pore of your skin.

**Bring out
your beauty with
high-concentration
carbonic acid.**

POTENTIAL OF CARBONIC ACID

**Dissolve and blend...
The “CO₂ Retention Method”**

To tap the unlimited potential of carbonic acid for beauty care, we researched the benefits of carbonic springs and applied what we learned to develop PLOSION's high-concentration carbonic acid beauty care method.

This “CO₂ Retention Method” enables a high concentration of pure carbonic acid to blend with the lotion.

Saturating your skin with carbonic acid is a new solution that can lead to enhanced beauty.

Hydrate your skin for a smooth
and glossy finish.
A rich moisturizing experience
with every spray.

Each spray is an uplifting sensation in which you can feel
your skin overflow with translucency.
Combine PLOSION with your skin care regimen to give your skin
the attention it deserves. Apply it over your makeup in the evening
when your skin is usually in dire need for hydration.
Let PLOSION guide your skin to a healthy glow.

A beauty lotion designed to be compatible with carbonic acid

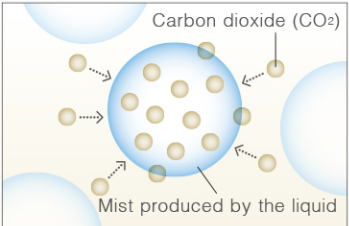

PLOSION
FACE ESSENTIAL LOTION
EMOLLIENT

In line with PLOSION's unique "CO₂ Retention Method",
this lotion is designed to be compatible with carbonic acid.
The lotion is a blend of natural components combined with
ingredients that are the current focus of cutting-edge skin
science*.
The instant it saturates your skin, you will experience
a deep moisturizing unlike anything you've felt before.
*Palmitoyl tripeptide-5, glucosylceramide (moisture retention)

"CO₂ Retention Method" dissolves carbonic acid
to yield three times the average concentration*.

Highly compatible with carbonic acid, PLOSION
cosmetics features the "CO₂ Retention Method",
a unique process that allows a large volume
of carbonic acid to be dissolved in a liquid.
The mist produced by the liquid contains three
times the average concentration* of carbonic acid.
This high-concentration carbonated mist is unlike
any spray you've experienced before.

*Based on MTG test results

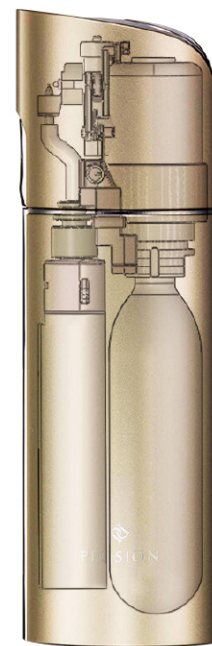

PLOSION CARBONATED MIST

Handy Unit

Carbonic acid beauty care you can carry to anywhere.

Packed into the industry's smallest compact body, PLOSION features all the functionality of carbonic acid beauty care favored by beauty professionals. Designed for convenience and functionality, the PLOSION sprayer is capable of emitting a small but powerful jet of carbonated mist.

1 A 27 μ m fine particle mist that can be sprayed over makeup

PLOSION features an L-shaped structure that fixes the nozzle into position to emit a stable blast of approximately 27 μ m fine particle mist. The nozzle itself allows the mist to be evenly and thoroughly distributed over the skin to deliver a pleasant sensation.

2 An originally designed gas cartridge with an exclusive lotion bottle

Specifically designed to be compact, PLOSION goes everywhere you go and can be used whenever your skin needs a blast of high-concentration carbonic acid.

3 Two functions that prevent accidental discharge and liquid leakage

PLOSION features a special "slide lock mechanism" that locks the sprayer when the slide cover is lowered and a "nozzle cap" to prevent leakage when the sprayer is not in use. These functional designs make it possible to use PLOSION whenever and wherever you need it.

4 A clear window lets you see how much lotion you have left

The lower section of the casing features a window that lets you easily check how much lotion is remaining in the bottle. With this helpful feature, you can avoid running out of lotion.

SCENE

Maintain optimum skin purity
anywhere, anytime.

Mornings

Pre-makeup

Take time out from your busy morning to saturate your skin with carbonated mist. Start the day off fully moisturized.

Afternoons

During a lunch break

One-touch facial moisturizer improves the appearance of radiance and a natural glow over the makeup.

Evenings

Right before a night out

Touch up your makeup with just one push of the refreshing mist to enhance the appearance of your skin.

Nights

After shower/ bath

Give a treat to your skin while relaxing after shower time for a glowing skin from within*.

*Keratin layer

PLOSION Carbonated Mist Handy Set

¥27,500 (excluding tax)

Contains:

- Carbonated Mist Handy Unit X 1
- PLOSION FACE ESSENTIAL LOTION EMOLLIENT 13mL X 2
- CO₂ Cartridge for PLOSION HANDY X 1

[Product Number] •White/ PL-HS1920B-W
•Gold/ PL-HS1920B-G
•Purple/ PL-HS1920B-V

[Accessories] Compact Portable Bag, Cleaning Brush, Instruction Manual (with Warranty), Simple Instruction Book

[Size] Approximately W40 x D47 x H149mm

[Materials] ABS, PC, PP, POM, silicone, polyurethane, stainless steel, brass, NBR

[Weight] 174 g * Carbonated Mist Handy Unit only.

PLOSION FACE ESSENTIAL LOTION EMOLLIENT 13mL

4-bottle Set \ ¥5,600 (excluding tax)

12-bottle Set \ ¥16,800 (excluding tax)

CO₂ Cartridge for PLOSION HANDY 15g

2-cartridge Set \ ¥700 (excluding tax)

6-cartridge Set \ ¥2,100 (excluding tax)

* Double safety seal
Food additives carbon dioxide (CO₂)

*Product specifications are subject to change without notice in order to improve product performance.
*Product color may vary slightly from photos. Benefits are not guaranteed, and may vary based on the user.
