	Black : YS-AK03A
[Size]	Approx. W450mm×D370mm×H380mm
[Weight]	Approx. 2.6kg
[Weight Capacity]	Approx. 120kg
[Material]	Structural Material: Polypropylene
	Cushioning Material: Urethane foam, EVA resin
	Upholstery Material: 90% Polyester, 10% Polyurethane

● Please note that some specifications may be changed without prior notice for product performance improvements. ● Wrinkles, lines, or slight dents may occur as part of the manufacturing process and are not considered defects. ● The product color may slightly differ from the photos. ● If your hip size is 110 cm or larger, the product may not perform its intended function.

⚠ Safety Precautions

Please follow the instructions below when using this product. [Do not use if you are in the following conditions.] ● Small children ● People with physical disabilities ● People under the influence of alcohol ● People who are drowsy or unconscious [If you are in the following conditions, please consult a doctor before use.] ● People with conditions such as herniated discs or sciatica, or any other issues with the lower back or back ● People with conditions such as hemorrhoids ● People with skin abnormalities in areas where the product will come into contact, such as cuts, rashes, swellings, purulent conditions, or excessive sunburn ● Pregnant women or those who have recently given birth ● People with bone disorders, such as osteoporosis ● People with acute conditions, such as spinal fractures or muscle strains ● People who do not fall into the above categories but feel uncertain about using the product.

⚠ Usage Instructions

● Do not use in unstable locations, such as chairs without backrests or seats in vehicles. ● Due to the nature of the materials, friction with other surfaces may cause color transfer or staining. ● Depending on the material, such as flooring, tatami mats, sofas, and chairs, there is a risk of color transfer. Please use this product on top of a cloth or similar material to prevent instability. ● Do not use or store this product outdoors, in direct sunlight, or in places exposed to high heat or humidity.

Style SMART

The ultimate in comfort — evolving posture care.

Thanks to a unique system that applies chiropractic methods, it provides comprehensive posture care simply by sitting. With flexible posture support and a soft seating experience, you can remain comfortable even during long periods of sitting. The beautiful form and chic colors of Style SMART combine to add sophistication and elegance to your daily life.

Advanced true posture care with our unique features.

Chiropractic Support System

The key to achieving proper posture in chiropractic care is to stabilize the pelvis and maintain the S-curve of the spine.

By supporting the iliac bones to stabilize the pelvis and the lumbar spine to maintain the S-curve, it effectively supports correct posture.

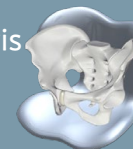

Point 1 | “Align” the Pelvis

The forward-tilted seat angle helps keep the body's center of gravity toward the front. Guides you toward ideal posture with an upright pelvis.

Point 2 | “Support” the Pelvis

By firmly supporting the Iliac bones from both sides, it keeps the pelvis in a stable position.

Point 3 | “Distribute” Body Pressure

The curved shape that fits the body reduces muscle compression while preventing the pelvis from tilting backward or shifting side to side.

Correct posture starts with the right sitting position.

The lower back is the foundation of the body. It is an incredibly important area. By properly supporting the lower back while sitting, your body will naturally adopt the correct posture. Maintaining the natural S-curve of the spine leads to a beautiful body line.

Style SMART

To stay comfortable during long sitting hours, it's key to maintain the correct posture and distribute your body weight evenly.

It's said that the amount of time Japanese people spend sitting each day is among the longest in the world. Many common chairs, combined with habitual sitting positions, tend to concentrate body weight on certain areas, causing strain.

By distributing weight evenly and consciously maintaining proper posture, long sitting hours can become much more comfortable.

Central Chiropractic Chiropractor
Takeharu Daito

Soft, comfortable seating for long hours of sitting.

Made with soft molded urethane

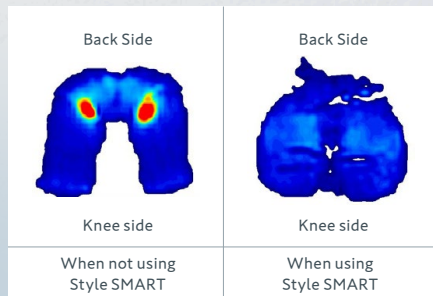

It gently fits the body's contours with just the right amount of elasticity and excellent pressure absorption.

This helps make long sitting periods much more comfortable.

Correct posture distributes body pressure, reducing strain on the body.

By maintaining correct posture, the localized pressure is evenly distributed, alleviating strain on the lower back.

*Target group: 29-year-old male
*Condition: Comparison of seat pressure distribution with Style SMART used and unused
*Measurement device: XSENSOR X3 PRO seat sensor
※Note: Results may vary by individual. (Internal research)

Make your busy days more comfortable.

At home or in the office. Can be used in various settings, no matter the location.

Office

With its soft seating comfort, you can stay comfortable even after sitting for long periods.

In your living room or dining

Style SMART USER'S VOICE

It feels like the chair fits my body perfectly and provides great support.
[30s Male]

I can sit comfortably for PC work at home or in the office. It's stable, making it easy to sit in.

I liked how it naturally corrected my posture. [20s Female]

The seating is so natural, I want to stay seated for long periods. It's so comfortable, I'd love to use it in my room.
