Perfect your posture.
Keep your mind in good condition.

Style Sofa WL

Blissful seating comfort is found through proper posture.

The comfort that a sofa should provide.

It's the sense of relaxation from the moment you sit down.

But we believe the most important thing is that this comfort lasts.

A sofa that remains comfortable while you sit.

The key to achieving blissful seating comfort lies in the ideal posture with minimal strain on the body, the "S-curve posture."

Experience blissful comfort that lasts, bringing you daily relaxation.

That's the Style Sofa WL.

More beautiful, more refined.

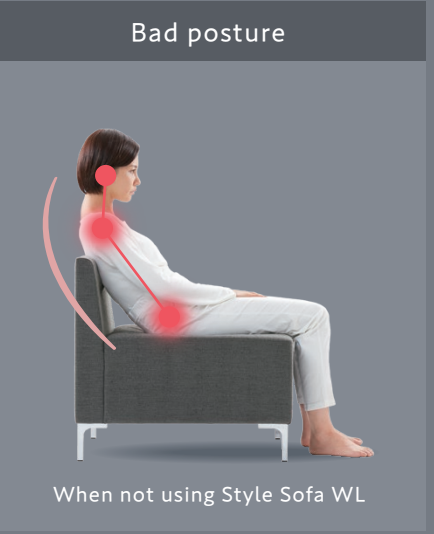

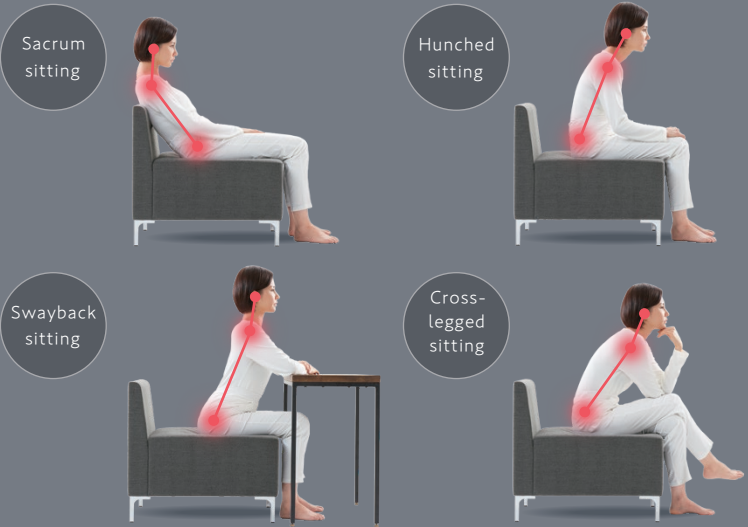

True posture care that blends
seamlessly into your lifestyle.

Is your sitting posture becoming a burden on your body every day?

The WL uses a unique shape to guide you into the ideal S-curve posture.

It may feel comfortable when you first sit down, but after some time, you may start to feel discomfort in your neck, shoulders, and lower back.

At such times, you may be adopting a sitting posture that places strain on your body. The Style Sofa WL features a one-of-a-kind design developed based on the brand's exclusive theory. It helps maintain the ideal "S-curve" posture, ensuring comfort and supporting a healthy posture throughout your sitting experience.

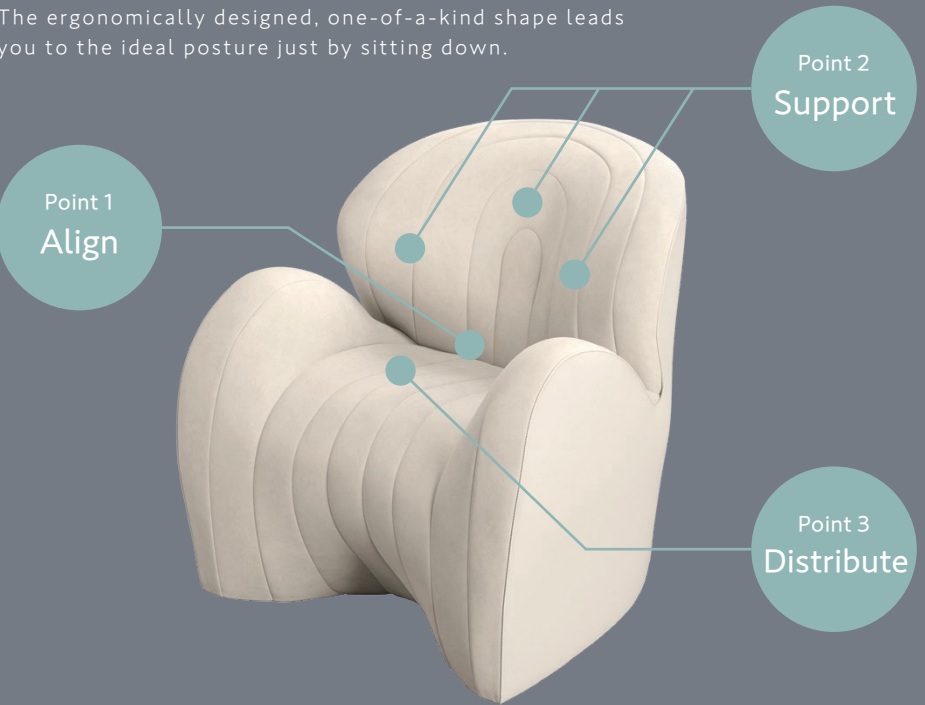

What is the S-curve posture?

The S-curve posture refers to a position where, when viewed from the side, the pelvis is aligned and the spine forms an S-curve.

With three key points, Style's unique posture support structure guides you into the S-curve posture.

The ergonomically designed, one-of-a-kind shape leads you to the ideal posture just by sitting down.

Point 1 "Align" the lower back

The backward tilt of the seat helps prevent the body from sliding forward. By increasing the contact area with your body, it naturally guides you into a deeper state of relaxation. It also encourages an upright pelvis, stabilizing the lower back and reducing strain on your lower back.

Point 2 "Support" the back

The high backrest and shape that presses under the shoulder blades support the thoracic spine, guiding you to the S-curve posture simply by sitting. It naturally guides the spine into a natural arch, reducing strain on the neck and shoulders.

Point 3 "Distribute" body pressure

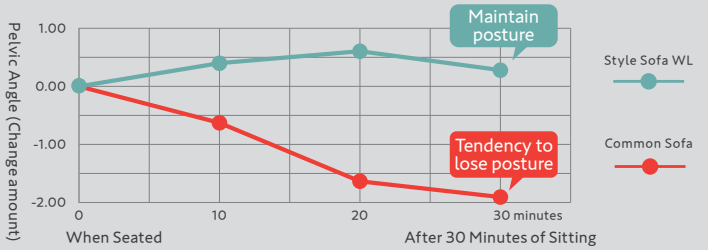

The body-fitting shape reduces muscle compression while preventing the pelvis from tilting backward and minimizing side-to-side movement. Additionally, the structure distributes body pressure, making it easier to remain comfortable even after sitting for long periods.

Research findings in collaboration with Morinomiya Medical University.

The comparison of the pelvic angle on the seat of Style Sofa WL and a common sofa showed that with the use of Style Sofa WL, the pelvis remains aligned without tilting backward, and the pelvic angle is maintained even after 30 minutes of sitting. In contrast, with conventional sofas, the pelvis tends to tilt backward — and this backward tilt tends to become even more pronounced over time.

【Subjects】 Male: 13, Female: 6 Age: 23.4 ± 4.9 years Height: 168.9 ± 9.3 cm Weight: 64.1 ± 11.5 kg
【Graph (Average Values)】 Vertical axis : Pelvic angle (change amount) Horizontal axis : Time (minutes)

The ideal posture, the "S-curve posture," is achieved by keeping the pelvis upright and the spine in its ideal position. Maintaining this posture on a sofa can be quite challenging, but with the Style Sofa WL, your hips stay firmly in place, and both your pelvis and spine are supported in a stable manner. By making the ideal posture a habit with the Style Sofa WL, you can prevent various discomforts caused by poor posture and work towards a healthy body and mind.

A modern design that blends seamlessly with the body and lifestyle, born from posture theory.

The Style Sofa WL is designed based on Style's unique posture theory. The result of prioritizing comfort for the body, its soft curves give rise to a beautifully modern design.

A fabric with a high-quality feel that soothes the mind with every touch.

The seat and backrest are covered with suede-like fabric, offering a soft touch that enhances comfort. Additionally, the side panels are trimmed with faux leather, adding a glossy and luxurious feel that elevates the space.

A carefully crafted three-layer urethane structure that provides firm support and gentle cradling.

To maintain comfort from the moment you sit down, it was crucial to enhance pressure distribution. By using urethane with varying softness for the seat and backrest, the optimal combination was tested to ensure minimal sinking and strain. Each part is perfectly supported, providing the ideal seating comfort that is gentle on the body.

Thoughtfully designed with a focus on ease of sitting and standing.

To make standing up easier, the base features a curved dip for your feet. The curves of the armrests and seat also support natural sitting and standing movements. Additionally, the One-Seater has a lightweight design, weighing only approximately 6.7 kg, making it perfect for easy rearranging.

Life of comfort.

Living comfortably.

Two lineups that can accompany both your personal time and family time.

With a sofa that fits various lifestyles, we want to bring the lasting comfort of blissful seating to many people.

That is the wish behind the Style Sofa WL.
