Light Pink F01

Light Beige F01

Light Grey F01

Grey F01

Brown F01

Product specifications

Product name:	Style Standard	Material:	[Structural Materials] Polypropylene [Cushioning Material] Urethane foam, EVA resin [Fabric] 100% Polyester
Item number:	(Light Pink F01) YS-AV05A, (Light Beige F01) YS-AV21A, (Light Grey F01) YS-AV14A, (Grey F01) YS-AV23A, (Brown F01) YS-AV08A	Included items:	Main unit (1), Accessories: Instruction manual (1), Warranty card (1)
Size:	Approx. W440mm×D390mm×H330mm	Country of Origin:	China
Weight:	Approx. 1.2kg		
Weight capacity:	Approx. 120kg		

- Product meets the standards of the "JISL1092 Textile Product Waterproof Testing Method - Spray Test". (Please note that it is not waterproof, so liquids may seep in if left unattended.)
- If your hip size is 110cm or larger, the product may not perform its intended function (there is no issue with the product quality).
- Please read the included instruction manual carefully before use.

Warm Gray N01

Black N01

Product specifications

Product name:	Style Standard	Material:	[Structural Materials] Polypropylene [Cushioning Material] Urethane foam
Item number:	(Warm Gray N01) YS-AQ14A (Black N01) YS-AQ03A	Included items:	Main unit (1), Accessories: Instruction manual (1), Warranty card (1)
Size:	Approx. W420mm×D390mm×H330mm	Country of Origin:	China
Weight:	Approx. 1.4kg		
Weight capacity:	Approx. 120kg		

- If your hip size is 110cm or larger, the product may not perform its intended function (there is no issue with the product quality).
- Due to the manufacturing process, there may be slight differences in color, scratches, small holes, etc. between products, but this does not affect their use.
- Please read the included instruction manual carefully before use.

⚠ Safety Precautions

[Do not use if you are in the following conditions.]

- Small children
- People with physical disabilities
- People under the influence of alcohol
- People who are drowsy or unconscious

⚠ Usage Instructions

- Purpose of Use: This product is designed to support sitting posture.
- Do not use in unstable locations or conditions.
- Avoid high-temperature and high-humidity environments (such as bathrooms or inside cars) and store it in a place where direct sunlight does not reach.
- Do not store near small children or pets.
- When disposing of this product, please follow the disposal method specified by your local municipality.
- This product cannot be washed in a machine.

 Style

Guiding You to Proper posture.

Style Standard

A healthy life starts with the correct posture.

Thanks to a unique system that applies chiropractic methods, Style Standard enables comprehensive posture care simply by sitting.

To live a life free from health issues, Style Standard supports the development of your proper posture.

Knowing how to maintain the correct posture leads to the prevention of many health problems.

Correct posture is when the ear canal, shoulders, and pelvis are aligned in a straight line. While it's easy to understand this concept, making it a habit is not as simple.

To prevent health issues caused by bad posture, it is essential to develop the habit of correct posture.

Central Chiropractic Chiropractor

Takeharu Daito

Correct posture is achieved by properly adjusting and maintaining your sitting posture.

Bad sitting posture distorts the body.

If you continue with bad sitting habits, such as slouching or tilting your body, your body will become increasingly misaligned. While common, positions like sitting sideways or leaning to one side put strain on your body.

Side sitting

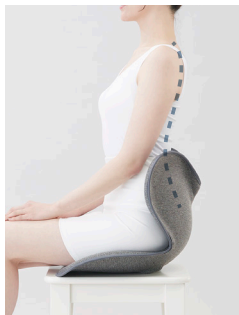

Diagonal sitting

Correctly support your lower back and align your sitting posture.

The lower back is the foundation of the body. It is an incredibly important area. By properly supporting your lower back and maintaining that sitting posture, your body will begin to naturally adopt it. Maintaining the natural S-curve of the spine leads to a beautiful body line.

Bad posture

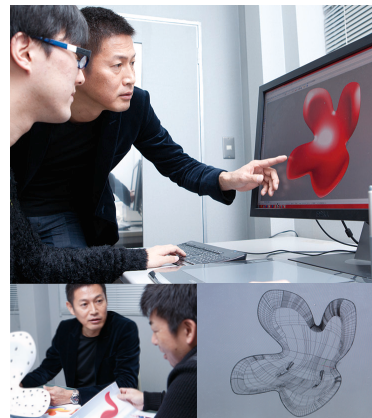

Correct posture

The key to achieving proper posture lies in chiropractic techniques.

Even during everyday activities, posture can deteriorate due to various factors. "Style" is built upon techniques that focus on aligning the body, inspired by chiropractic methods.

The smooth, streamlined design was created to mimic the hands of a chiropractor.

The "Style" shape is the result of thorough research on the human body. The lumbar support area replicates the movements of a chiropractor's hands. Additionally, the curved shape modeled after the human body, fits perfectly, ensuring that proper posture is maintained simply by sitting.

The unique "Chiro Support System" guides you to the correct sitting posture from a chiropractic perspective.

POINT 1

"Align" the Pelvis

By firmly supporting the Iliac bones from both sides, it keeps the pelvic in a stable position.

POINT 2

"Support" the Pelvis

The forward-tilted seat angle helps keep the body's center of gravity toward the front. It leads to the ideal posture with the pelvis properly aligned.

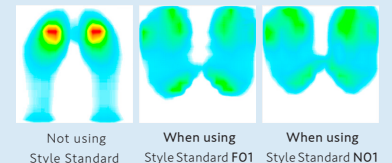

POINT 3

"Distribute" Body Pressure

The body-fitting curves prevent muscle compression while also preventing the pelvis from tilting backward and reducing side-to-side movement.

Proper posture distributes body pressure, reducing strain on the body.

By maintaining proper posture, localized pressure is dispersed, alleviating the strain on the lower back.

Target group: Example of a 30-year-old female.

•Condition: Comparison of body pressure distribution while sitting on a chair with Style Standard used or unused, measured using body pressure distribution measurement equipment (internal research).

•Note: Results may vary by individual.

Choose a style that fits the atmosphere of your room and your personal preferences.

With a wide range of design variations to choose from, including two different materials and multiple color options.

Transform your living space by seamlessly incorporating it with your sofa or dining chairs or use it as a striking accent piece in the room.

Choose the style that perfectly complements your interior and enhances the atmosphere.
